

BUILD AN EVENT MANAGEMENT SYSTEM USING SALESFORCE

1 INTRODUCTION

Overview

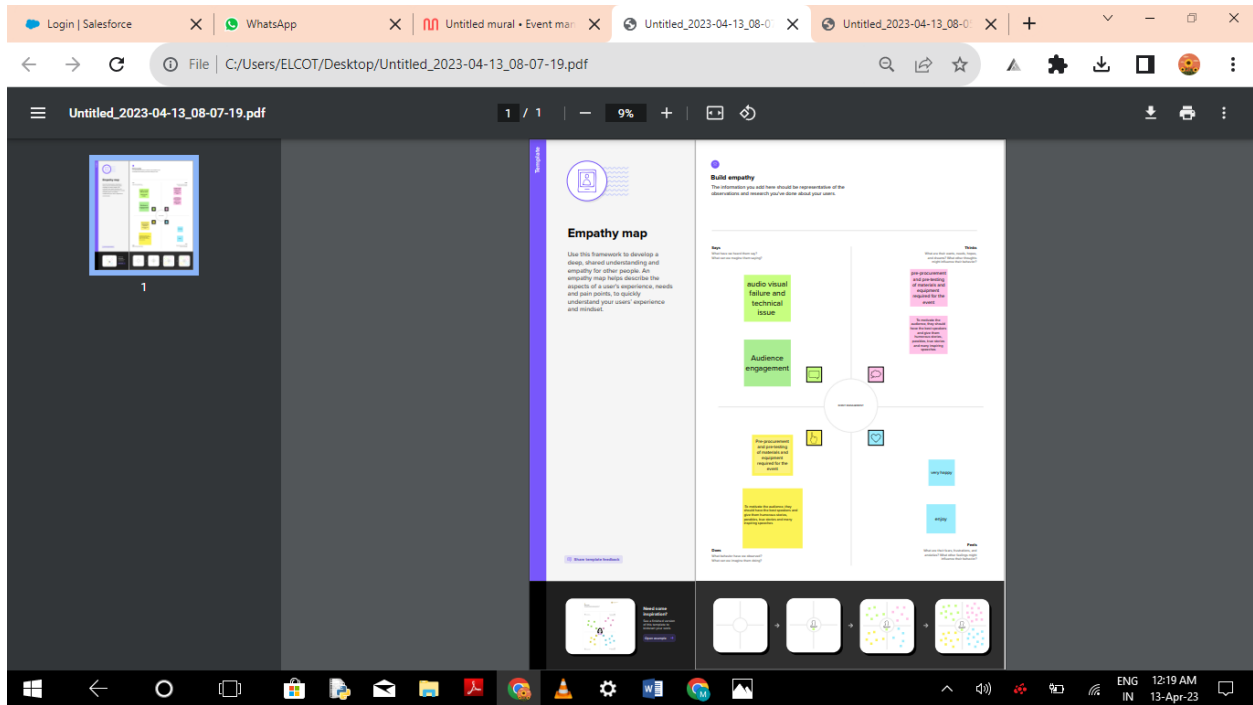

Event management is the process of creating and maintaining an event. This process spans from the very beginning of planning all the way to post –event strategizing. At the start, an event manager makes planning decisions, such as the time, location, and theme of their event .During an event, event mangers oversee the event live and make data , submitting KPI and ROI finding ,and staying on the ball for any post-event offerings. All different branches of planning go into event management, including various types of sourcing, designing, regulation checks, and on-site management. In event management, you could be in the process of creating a conference, a product launch, an internal sales kick-off, or even a wedding. Really, any event that requires considerable planning and execution is event management.

Purpose

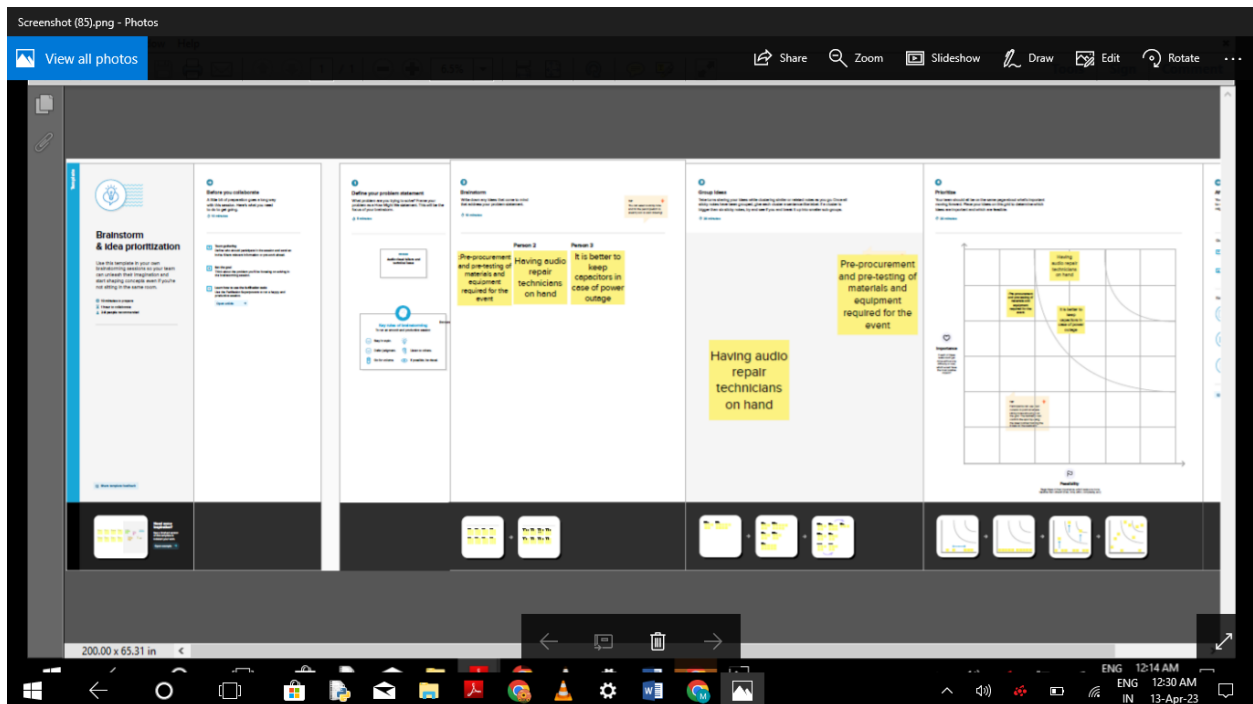

A truly comprehensive event management system will allow users and organizers to access and manage all aspects of an event, including registration, marketing, engagement, integrations, physical planning and preparation, reporting and analytics, and more

SETUP Tabs

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.
